EXPERIENCE

•Software Developer & Support Specialist

Aug 2025 – Nov 2025

OFFTEC - Integrated Solutions Team

OnSite

- Maintain and enhance high-performance enterprise applications and custom integrated .software solutions for corporate clients
- Design and deploy tailored business architecture features and provide advanced technical .troubleshooting for production systems

•Junior Application Developer

Sep 2024 – Aug 2025

PIO-TECH

OnSite

- Contributed to developing and optimizing enterprise banking solutions, specifically Fund .Transfer Pricing (FTP) and Anti-Money Laundering (AML) systems
- Resolved critical bugs and enhanced code quality across secure financial platforms using .C, ASP.NET, and Oracle PL/SQL

PROJECTS

•Gym Management System

This project 1 club buy it until now

- Developed an end-to-end management backend with robust modules for member .tracking, subscription logic, and payment processing
- Built automated financial reporting features using ClosedXML to export ..custom-branded Excel reports

•JobFlow – Distributed Job Processing Platform

Project for processing jobs in any time

- Architected a distributed background task processing system using .NET and RabbitMQ to .handle high-volume asynchronous tasks
- mplemented a dedicated Worker service and containerized the full stack using Docker Compose for seamless environment consistency
- DevOps & Containerization: Architected the full stack deployment using Docker& Docker Compose, orchestrating PostgreSQL, RabbitMQ, and .NET services for seamless environment consistency.

•News Website

Personal project

- Developed a comprehensive news website with features such as article posting, user comments, and real-time updates
- Implemented user authentication using JWT. Stored and managed data in SQL Server , and using T-SQL in all queries.
- Technologies Used: ASP.NET Core API , T-SQL , ADO.NET , HTML, CSS, JavaScript, Bootstrap.

•DVLD

Desktop Application

- Developed a desktop application for managing the DVLD (driving license), offering features like creating local licenses, replacing them, renewing them, and adding international licenses.
- This application aids administrators in efficiently managing driving license activities.
- Built with .NET Framework (C) and SQL Server , the application uses a 3-tier architecture for reliability and flexibility

TECHNICAL SKILLS

Languages: C++/C#, Typescript, Javascript, HTML+CSS

Web Dev Tools: Nodejs, VScode, Git, Github, Docker

Frameworks: Angular , PrimeNG , Bootstrap , Tailwind

Cloud/Databases: MongoDB, Supabase , Relational Database(PostgreSQL, SQL Server, Oracle PL/SQL)

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management System, Software Engineering.

Areas of Interest: Web Design and Development, DevOps.

Soft Skills: Problem Solving, Self-learning, Presentation, Adaptability
